Dear Hiring Manager,

I am a student at Rutgers University pursuing majors in Computer Science, Data Science, and Economics, with a growing interest in how technology and data can be used to solve meaningful, real-world problems. I am particularly drawn to the intersection of software development, artificial intelligence, and data analytics, where technical innovation can create practical solutions and improve people's everyday experiences.

Through my coursework, independent projects, and internship experience, I have developed a foundation in programming languages such as Python, Java, and JavaScript. During my internship at Regain AI, I collaborated with developers on a machine learning project focused on identifying potentially addictive applications. This experience gave me the opportunity to explore how technical ideas can be translated into practical applications while strengthening my problem-solving, collaboration, and communication skills.

While I enjoy the technical side of problem-solving, I also value the human side of technology. Through my experiences as a Sunday school teacher and a center assistant at Kumon, I have learned how to break down complex concepts, adapt to different learning styles, and approach challenges with patience and creativity. These experiences have shaped the way I think about technology: not just as something we build, but as something that should be accessible, useful, and designed with people in mind.

I am someone who genuinely enjoys learning and exploring new areas of technology. Whether I am strengthening my programming skills, independently studying SQL through Oracle FreeSQL, or exploring applications of machine learning, I am always looking for opportunities to challenge myself and grow. As I continue my academic and professional journey, I hope to contribute to projects that combine technical innovation with meaningful impact.

I welcome opportunities to collaborate, learn from others, and contribute to teams working on interesting challenges. Thank you for taking the time to explore my portfolio. I look forward to connecting and sharing more about my experiences, interests, and future goals.

Best regards,

Farhana Ashiq
